

# Gemini Robotics Teams: Help Us Pick Up Some STEAM!

At East Maine District 63, we're committed to empowering all of our students to succeed in a changing world – and STEAM (science, technology, engineering, arts, and math) is a key part of our Gemini curriculum.

**Join our team! Every year, our award-winning STEAM Robotics Teams tackle a robot building project and compete in the *FIRST LEGO* League – and you can be part of it.**

Help support the STEAM team this year as they prepare for competition by conducting research and building their team robot – there are so many ways to get involved!

Area of Need	How You Can Help	Goals
Experts in technology, engineering, science, space, prototype build, or marketing	Provide expert feedback as we develop a research project focused on robotics and humans in space	A presentation for the judges that includes well-researched data, a prototype of the solution, and evidence that we've consulted with experts.
Community outreach	Expand our opportunities to share the teams' knowledge with the larger Niles community.	To demonstrate that we've connected with our community – and to encourage our students to make their own connections.
Supplies	Support the teams with tools, wood, metal pieces, scraps, art supplies, paint, design boards, and display boards.	A tested and reliable prototype – as well as a high-quality, professionally designed presentation board.
Financial support	Help underwrite buses for community outreach and competition days, team t-shirts, food, robot parts, supplies, competition fees, and field trips.	To build a model, first-class Robotics Team that helps our junior high students achieve success without boundaries!
<b>Donors making monetary or in-kind contributions valued at \$100 or more will be featured on the team t-shirt!</b>		

**Questions? Let us know – we love our teams and are happy to share.**
